Overview :

- ✓ It all started in 1983 with the World's first commercially available Sales And Marketing Management system (SAMM).
- ✓ It was also one of the first systems developed in a 4th Generation Programming Language (4GL) by non traditional programmers.
- ✓ The development of an integrated accounting system came in the mid 1980's – again a "First" to combine a CRM (Customer Relationship Management with the back-end accounting process.
- ✓ We were the first Software House to win the coveted Australian Small Business Award in 1990, in recognition of the company's financial and marketing success.
- ✓ During the early 1990's InterAcct continued to invest heavily in the emerging Windows technology releasing the ClearView Windows based application generator in 1995.
- ✓ ClearView has benefited from virtually continuous ongoing enhancement from that date, and provides InterAcct with a powerful database engine.
- ✓ Ultimately, the success of InterAcct has been due to the ability to quickly (and therefore inexpensively) change the software to meet a customer's specific requirements.
- ✓ After over twenty five years now, InterAcct continues to enhance the software as a result of suggestions from customers, and ideas from the business minded InterAcct Team.
- ✓ Exactly "what" InterAcct does as a business/accounting (ERP) package is well documented by numerous software profiles.
- ✓ "How" it operates, in terms of access speed and ease of use, can be easily demonstrated.
- ✓ InterAcct interfaces with other Microsoft based products with simple Cut & Paste of text, and links an email addresses to MS-Outlook – either singly or as a selected group of names.
- ✓ Click on a web address stored within InterAcct and it will open up your Internet Brower to that site automatically.
- ✓ With the Document Library, you can link to a document (MS-Word) or view a photo image.
- ✓ In a similar way, each address stored can be used to link into Google Maps – showing how to get there for deliveries.
- ✓ Data can also be easily imported and exported from InterAcct.
- ✓ Experience counts when planning for a smooth running implementation of your new InterAcct system.
- ✓ Training can be done On-Site, or On-Line, or in InterAcct's office. It's entirely at the customer's discretion how much training time is needed, and you simply pay as you go.
- ✓ There are three payment plan options to consider. Please refer to the "Products & Services" agreement for details.

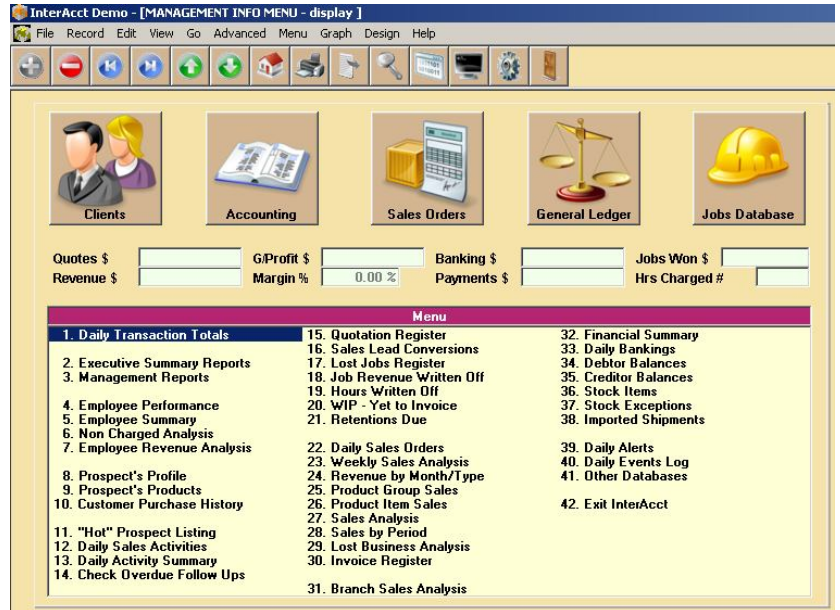

Description – Software & Annual Support Costs	3 - 5 Users	10 Users	20 Users	50 Users
